

Health, COVID-19 and Nature

13th Annual Conference of the Arab Forum for Environment and Development (AFED)

Marco Lambertini
Director General
WWF International

The Planet is in crisis

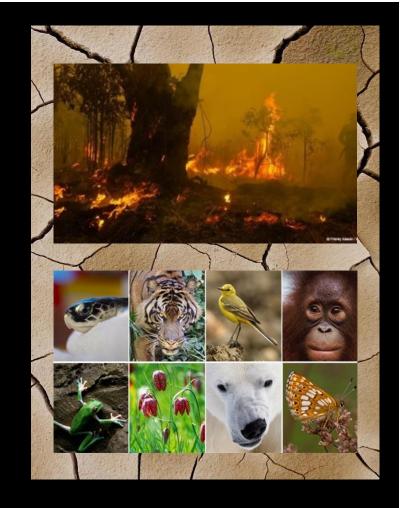

1°C

Global Temperature increase since preindustrial times...1,5° is danger zone!

Species threatened Species threater with Extinction

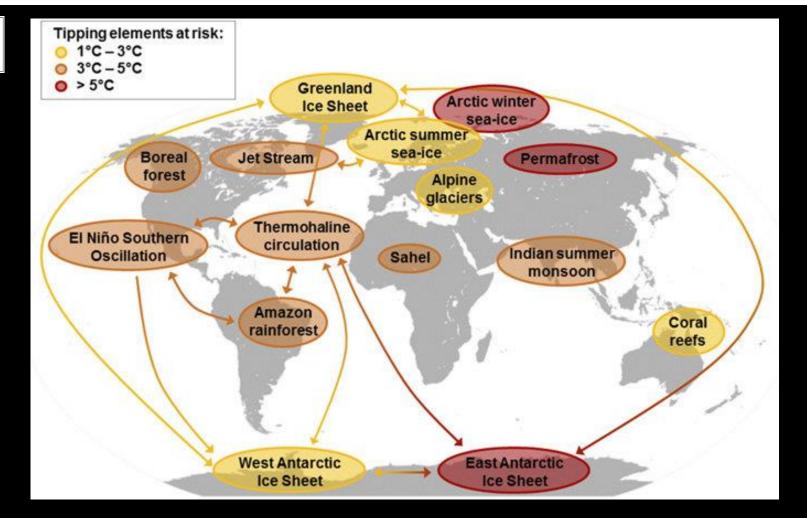

68%

overall decline in wildlife populations in 50 years!

We Know

The two sides of the ecological challenge

Climate Change

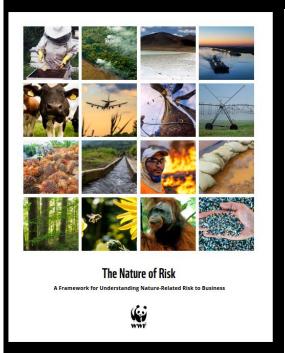

We (begin to) Understand

The Consequences for us of our impact on Nature

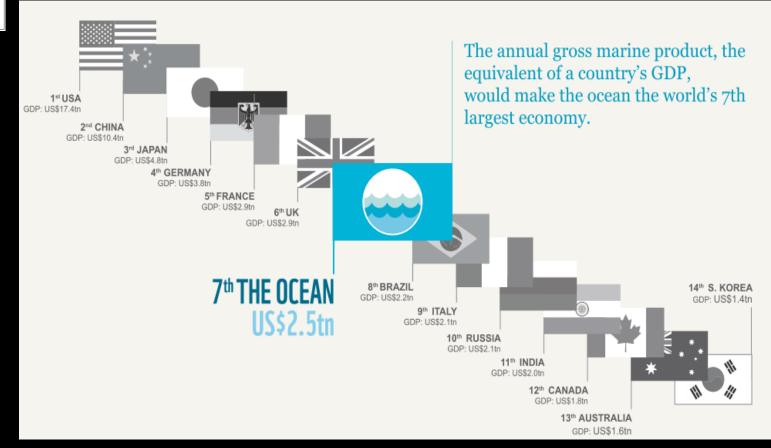

Climate Change & Nature Loss are an Economic Risk and Cost

US\$ 44 T of economic value generation at risk due to dependence of business on nature's services

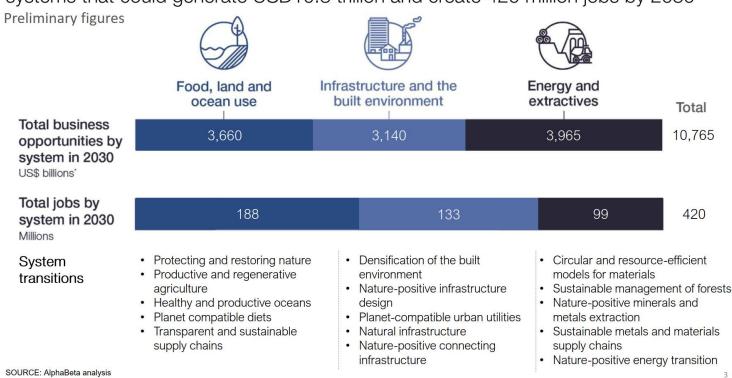

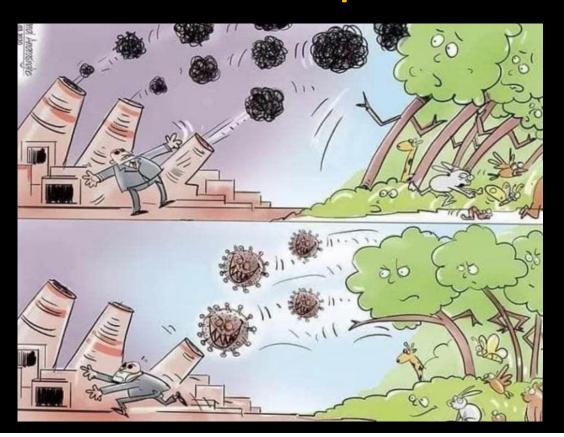

The Economic Opportunity

Five transitions for nature-positive pathways have been identified in each of the three systems that could generate USD10.8 trillion and create 420 million jobs by 2030

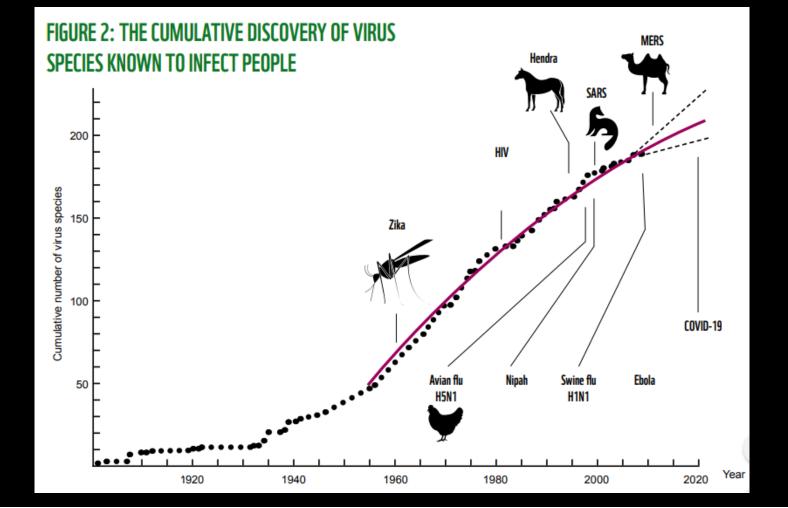

We must rebalance our broken relationship with the Planet

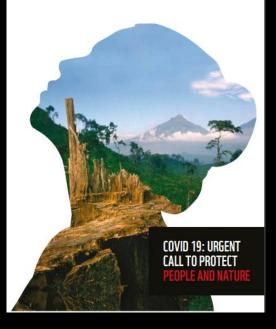

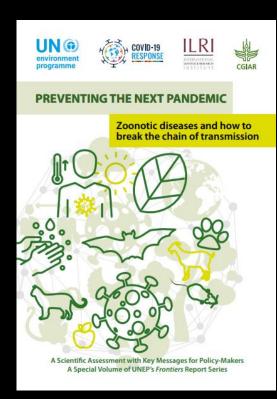

IPBES WORKSHOP ON BIODIVERSITY AND PANDEMICS

EXECUTIVE SUMMARY

Intergovernmental Platform on Biodiversity and Ecosystem Services

Covid-19 is the result of our imbalance with nature and the animal world.

75% of new human infectious diseases come from other animals

- wild animals
- domesticated animals

WILDLIFE TRADE & CONSUMPTION

DEFORESTATION – also increases human/wildlife contacts

INDUSTRIAL ANIMAL FARMING

There are more than 1,000 mink farms in Denmark

Denmark to cull up to 17 million mink amid coronavirus fears

We MUST & We CAN

Halt and Reverse Nature Loss

NATURE POSITIVE BY 2030

HALT & START TO REVERSE THE LOSS OF BIODIVERSITY & PUT NATURE ON A PATH TO RECOVERY FOR THE BENEFIT OF ALL PEOPLE & THE PLANET

2021 Super Year for the Environment & Sustainability

FOR NATURE FOR US
